## SS506: Benzophenone 4

CAS#: 4065-45-6

### Patient Information

Your patch test result indicates that you have a contact allergy to benzophenone 4. This contact allergy may cause your skin to react when it is exposed to this substance although it may take several days for the symptoms to appear. Typical symptoms include redness, swelling, itching, and fluid-filled blisters.

### Where is benzophenone 4 found?

Benzophenone 4 is an ingredient found in bath, makeup, hair, sunscreens, and skin care products.

### How can you avoid contact with benzophenone 4?

Avoid products that list any of the following names in the ingredients:

- |  |                               |
|--|-------------------------------|
| ■ 1-Phenol-4-sulfonic acid, 2-benzoyl-5-methoxy- (6CI) | ■ Seesorb 101S                |
| ■ 2-Hydroxy-4-methoxybenzophenone-5-sulfonic acid      | ■ Spectra-Sorb UV 284         |
| ■ 5-Benzoyl-4-hydroxy-2-methoxybenzenesulfonic acid    | ■ Sulisobenzona               |
| ■ BRN 2889165  | ■ Sulisobenzona [INN-Spanish] |
| ■ Benzophenone 4                                       | ■ Sulisobenzone               |
| ■ EINECS 223-772-2                                     | ■ Sulisobenzonum              |
| ■ HSDB 7422  | ■ Sulisobenzonum [INN-Latin]  |
| ■ MS 40  | ■ Sungard                     |
| ■ NSC 60548  | ■ Syntase 230                 |
|  | ■ Uval                        |
|  | ■ Uvinuc ms 40                |
|  | ■ Uvinul                      |
|  | ■ Uvinul MS 40                |
