

the art and science of smart patch testing™

NA81: Lavandula angustifolia oil (lavender oil)

Patient Information

Your patch test result indicates that you have a contact allergy to lavandula angustifolia oil. This contact allergy may cause your skin to react when it is exposed to this substance although it may take several days for the symptoms to appear. Typical symptoms include redness, swelling, itching, and fluid-filled blisters.

Where is lavandula angustifolia oil found?

Lavandula angustifolia oil is often found in the production of perfumes and aromatherapy products. It is also added to lotions of hair products, soaps, and as a medium to oil paints.

How can you avoid contact with lavandula angustifolia oil?

Avoid products that list any of the following names in the ingredients:

- EINECS 290-795-2
- Lavandula angustifolia angustifolia extracts
- Lavender oil
